

Summer Culture and Harvesting of Tomato

While a cut was promised and made effective when the interprovincial pipeline from Alberta to Superior, Wisconsin, was completed, it was stated that this had amounted to only one cent a gallon in Edmonton and half a cent in Calgary. The A.M.A. will take steps to obtain possible a greater price reduction.

Farrell Lake News

Miss Katherine Walker, and sister, Mrs. Margaret Armstrong were dinner guests of Mr. and Mrs. Jack McMurchy recently.

Mr. and Mrs. Raye Sweepe and daughters, were Hanna visitors last Friday.

There is much of interest in this booklet to prairie wheat producers. The statements that have caused much interest in Canada are as follows: "Through bulk purchases and long-term contracts Britain can be shielded for a while from world price movements."

Shortage Of Fertilizers

THE IMPORTANCE OF soil conservation is emphasized in almost every country today. The people on this continent were among the first to realize that the soil cannot be productive indefinitely unless the elements which the crops take from it are returned by man. There are several ways of preserving the richness of the soil and one of the most important of these is by the use of commercial fertilizers. The production of these fertilizers has become a great industry and they are used widely in every part of the world where crops are grown.

Growing Need In Far East

There is a serious shortage of fertilizers developed in the Far East. Mr. G. A. Galloway, of the United Nations Food and Agriculture Organization, who visited Canada recently, stated that the world production of commercial fertilizers is high, a shortage of sulphur is preventing an increase in production, which is used to meet growing demands. There is now increasing use for fertilizers in Asia and the Far East, and present production is not sufficient to meet this growing demand, the United Nations official said. Canada has good supplies just now, he said, but shortages may begin to develop in the coming year.

Supply Less Than Demand

The present situation is due to the serious shortage of sulphur for commercial purposes. The world supply of this important chemical is now estimated to be about 5,000,000 long tons, while 6,000,000 long tons are required to meet the annual need. The impending shortage of sulphur has been anticipated in Canada, and efforts are being made to increase the world supply from the refining of Alberta oil and in tar sands from the Athabasca River. A lack of commercial fertilizers would have a serious effect on world food production at this time, and it is to be hoped that some way of averting this impending shortage.

Calgary Zoo Now Boasts Of Five Cavies

CALGARY.—The Calgary zoo is proud to announce the birth to manna and papa cavy of a son, junior, a brother for the twins. Mamma and papa live in quiet domesticity at the zoo, fully unaware of the distinction they rate in cavy society.

Two cavy adults bred in captivity, and mamma's babies were the first cavy born in Canada and among the few born in North America.

Cavies are small, short-colored rodents with short round ears and feet as spindly for a tail.

Although they are closely related to the guinea pigs, they lived only once a year whereas guinea pigs... well, they keep pretty busy.

Papa cavy came to Calgary from Texas, while mother originated in England. The five Calgary cavy are—Mamma, Junior, and Junior, who was born this spring—live in a pretty size. Their favorite recreation, apart from digging, is basking in the sun.

Thind by nature, they live in burrows, and eat grass and vegetables, which is just as well considering the price of meat nowadays.

Loyds Think The Odds Against War Have Shortened

NEW YORK.—Loyds of London indicate they believe the odds against war have shortened in the last few days.

Oddest against war within the next six months is at 35 to 1. The odds against war within the next 12 months are at 10 to 1.

Earlier this year, the odds were 50 to 1 in a policy issued by the gathering of stamp collectors in Canada.

Old man, old man, the pebble rain, is changing the skin of modern football players. When I was in college, he was a football player. He was a football player for three years straight. He was a football player for three years straight. He was a football player for three years straight.

Footballers: "Ah, Dr. Grims! How do you like those branded pants we wear?"

Doctor: "My dear Mrs. Vesper, they were indeed delicious, but what an unappreciated opportunity was the spirit in which they were given."

"Last week I lent you \$10 for a day."

"No, you did, And, boy, what a day."

"Yes—'twas! I can't tell the sweetest little tale in the store today."

"—But if on and let's see what it looks like!"

"My dear, take things apart to see why they won't go."

"You'd better go."

Funny and Otherwise

As the train pulled into the station, the porter handed on a compartment door.

"Thank you, sir," the porter said. "I'll be right back."

"A minister told his flock he had been shipwrecked on the island of the dead."

"Well, I don't blame you for going," remarked the deacon, "but you should be more exact in your language. Person that died is dead."

"To save my drowning, ladies," said Macpherson, "I was glad to give a quarter, but I only saw a half."

"Never mind about that," replied the reverend. "I'll give you a quarter."

"Have any of your family come to the party?" asked the host.

"Yes, they traced an uncle of mine as far as Australia goes."

Filling out an application for a job, the chap answered, "No, I'm not a question as to whether he is a graduate."

"Yes, you're married, aren't you?" asked the clerk who knew him.

"Yes, sir," came the answer, "but my wife isn't dependable."

"Good evening, old man. Thought I'd drop in and see you about the umbrella you borrowed from me last week."

"Sorry," he sorry, but I lost it to a friend of mine. Were you wearing it?"

"Jones—'Well, not for myself, but the fellow I lent it to gave me the owner's wants list."

Young girl, looking up: "Would you like to give me a dollar for the Lord?"

Old man, nodding up: "No, I think I'm going to meet Him first. I'll give Him the dollar myself."

Parishioner: "Ah, Dr. Grims! How do you like those branded pants we wear?"

Doctor: "My dear Mrs. Vesper, they were indeed delicious, but what an unappreciated opportunity was the spirit in which they were given."

"Last week I lent you \$10 for a day."

"No, you did, And, boy, what a day."

Canada Is Now Importing Eggs For First Time

OTTAWA.—It is by an unusual egg scarcity, Canada for the first time in her history, is importing thousands of cases of eggs from foreign countries.

More than 5,000,000 dozens have been shipped to this country from the United States and Holland during the last few months. More are expected.

"At no time have I ever witnessed such a shortage of eggs in this country," said the Agriculture Department official said. "Usually Canada produces enough eggs to export. This year we're importing and we're taking all we can get."

"Three hundred dollars is the price of eggs in Canada is running at about 74,000 cases or about 2,200,000 dozens. The price of eggs in the United States is about 90,000 cases or about 2,700,000 dozens."

The shortage, the official said, likely will continue until next October or November.

"By that time, Canada's eggs to meet all of her needs—and even some left over for export. But I don't know what whether we'll be doing any exporting in the morning. At least eight persons died in the flames and 19 others were badly injured to one of San Francisco's worst residential fire since the earthquake of 1906.

Eleven of the estimated 100 or more residents suffered broken backs and limbs when they jumped in panic as flames licked off the roof of the building.

The current egg scarcity developed out of the sudden drop in the export market more than a year ago, the official explained.

In former years, Canada produced about 10 per cent of the eggs needed in the United States. The surplus was taken up by Britain.

In 1949 Britain announced that because of a dollar shortage, she would stop buying eggs from Canada. Canadian poultrymen were stunned.

Many began cutting flocks. Others left the business altogether. For a while the egg market sagged. The government was forced to move in with price support.

The poultrymen's fears proved unwarranted. With their flock-cutting proved too fast.

But by next fall, said the agriculture official, flocks should be back to about the 1949 level, producing all the eggs that Canada can handle.

Wife Of Indian Chief Active In Education Group

CALGARY.—Mrs. David Crowchild, wife of Prince Indian Chief, is active in the education group, which is the first Indian woman appointed a member of the school education committee.

Because it is the dream of Indian children that they should have the same educational opportunities for all Indians and white children, Chief and Mrs. Crowchild have been active in the education group.

They were first introduced to the Home and School Association about five years ago when their son Gordon was a student in Calgary.

"When the people explained to us how it worked, we joined and we have been members ever since," she said.

Chief Crowchild started a B.S.A. at the Prince Indian School last year. The first Indian Home and School Association in Canada, Mrs. Crowchild is treasurer of the branch.

Mrs. Crowchild is a well-educated woman who speaks English fluently. Her first language is the only language spoken by the Prince Indians.

In her spare time Mrs. Crowchild makes buckskin jackets, coats and moccasins for the Indians.

Her work earned her the distinction of being one of the few Canadian citizens who have received a letter from Prince Elizabeth.

"I made a pair of white headed baby buckskin moccasins for Prince Charles when he was born," she said. "I didn't think the Princess would accept them. I sent them anyway. She kept them and sent me a nice letter."

Mrs. Crowchild was one of many Indians attending the Calgary B.S.A. She was asked if she minded the crowds of visitors to the Indian B.S.A. meeting.

"I don't notice them," she said. "But some of them were here when I was here. They were here when I was here. They were here when I was here."

"I was here when I was here. They were here when I was here. They were here when I was here."

"I was here when I was here. They were here when I was here. They were here when I was here."

"I was here when I was here. They were here when I was here. They were here when I was here."

"I was here when I was here. They were here when I was here. They were here when I was here."

"I was here when I was here. They were here when I was here. They were here when I was here."

Plan Special Stamp For Royal Visit

OTTAWA.—The Post Office Department is considering the printing of a special commemorative stamp for the royal visit of Prince Elizabeth and the Duke of Edinburgh to Canada.

A spokesman said the Department plans a postal tribute for the occasion. However, one of the difficulties was that, although the Royal visit is expected to last for three months, there is no time to start the designing of an appropriate postage stamp.

Therefore the stamp commemorating the Canadian tour may not be issued until the visit is well under way.

Smoking Claimed To Be Chief Cause Of Forest Fires

Local citizens are responsible for over two-thirds of the forest fires that occur within their province, while Indians, who spend most of their time in the woods and regularly use campfires for cooking and warmth, are rarely to blame for starting them.

Victims of forest fires discovered, were responsible for starting fires thirty-three per cent of the time, thirty-seven per cent of the region's burned forest, while most of the remainder occurred in Indian territory.

This does not mean that Indians are never to blame for starting fires, but that such cases are so rare that they are negligible factors. According to the statistics furnished by the fire prevention unit, Indians are responsible for four per cent of the population in the area covered, while in one district they make up thirty per cent of the population.

In general, the survey found that restrictive controls such as fire permits, burning restrictions and similar measures were considered as being necessary for the prevention of fires. The survey also found that the individual educational methods, however, were not considered as being necessary for the prevention of fires.

When the survey was conducted, it was found that the majority of the population in the area covered, while in one district they make up thirty per cent of the population.

REMAINS RETURNED—The remains of SS. Simon Block are carried in a box as a procession returns the relics to the Priory at Aylesford, near Maidstone, Kent, England. In the year 1940, St. Simon became the first prior general of the Carmelite Order in Europe. The Archbishop of Bordeaux brought the remains from France.

HOSTS PROVIDE REPRESENTATION—In the "armistice city" of Kaesong, two North Korean soldiers are shown holding a case of beer across the courtyard as the Communists played host to Allied delegates at the armistice conference. Newsweek report the military officials and civilians are friendly and tend to ignore the non-interference rule of the Communists.—Central Press Canadian.

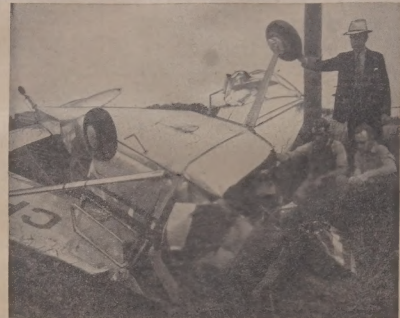

MAY FORM NEW FRENCH CABINET—Rene Mayer, minister of justice in the French cabinet, which resigned as a result of the June 17 election, agreed to try to form a new cabinet, after Prime Minister Maurice Petiaud concluded his five-day efforts with a failure. Mayer is shown being interviewed by members of the press as he left the Elysee palace after a meeting with President Vincent Auriol. Mayer is a member of the Radical Socialist party.—Central Press Canadian.

"GRAVEYARD OF MISSING PLANES" is the name given to the mine of Alaska mountain tops where search was conducted for the ill-fated Canadian Pacific airliner with 37 persons aboard. The ship was flying from Vancouver to Tokyo via Anchorage, Alaska.—Central Press Canadian.

CATTLE OCCUPIED LIVING ROOMS IN FLOOD—Stockyard cowboys are shown rounding up cattle that had strayed during the terrible flood that has been sweeping Kansas and Missouri. Through the water in the streets of Kansas City, Mo., is still knee-deep in many places, the flood has rendered sufficient to allow the rescue of cattle that had wandered away seeking high, flood-protected hiding places. Many were found inside suburban houses. The recent floods have killed hundreds of cattle, but most of those rescued have been in good condition, though some were so weak that they required the assistance of trucks to enable them to reach dry ground.—Central Press Canadian.

PARENTS DIE, CHILDREN SURVIVE LIGHT PLANE CRASH—Just before the plane became wreckage, Mrs. Donald E. Davis told her son, Alexander, age four: "Be a good boy and look after your sister." The plane crashed, Mr. and Mrs. Davis died without regaining consciousness, but Alexander, unharmed, was taken from the plane still with his arms around Jeannette, two. The plane crashed near Chatham, Ont., en route from Madison, Wis., to the Davis home in Toronto.—Central Press Canadian.

FLOOD MENACES PUMPING MACHINERY—Mississippi river floods menace the water supply of St. Louis, Mo., where and here are girded inside the pumping station to protect vital machinery. Water that seeps through the improved dike is pumped out through the hoses. St. Louis authorities fear flood damage to the area might run to \$2,000,000.—Central Press Canadian.

BEAUTY QUEEN—Winner of the Miss Toronto title for 1951 is Margaret Hill, 20-year-old Ruth Carrier, who is spending half of the \$1,000 prize money in voice lessons, giving the other half to her mother and father.—Central Press Canadian.

OCEAN-GOING DOCK—Admiralty Floating Dock No. 5 leaves Bermuda on a 2,000-mile voyage to Portsmouth, Eng., towed by Admiralty tug Forward and Warston. The 23,000-ton No. 5 is believed to be the largest craft leaving dry dock in the world—365 feet long, 115 wide—although it has never achieved 100 knots speed. The 5-day operation is Lt.-Comdr. Norman Hunter, whose last big job was towing the Canadian freighter Beauty Head from Quito, E.R., to Panama.

PHILIPPINES PROTEST JAP PEACE TERMS—John Foster Dulles, U.S. peace treaty negotiator, was harried and hurried in effect in Manila, capital of the Philippines, as more than 5,000 insurgent demonstrators denounced him as "betrayor of Philippine-American relations" and a "god-forsaken slave man" marked "John Foster Dulles" occupied the centre of a protest in the Plaza Marikina while a crowd of students from the "Liberal Youth League" the burning in only was the climax of the nation's growing anger against the "unfairness" of the proposed Japanese peace treaty. The Philippine government has taken a stand against acceptance of the treaty as it announced in Washington recently.—Central Press Canadian.

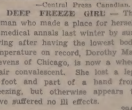

REVOLT PRISONERS PUZZLE TO SIAM—Unusually Siamese take to revolt against the government in its stride and no one is severely punished. But the result is when Prime Minister Phib Songkro was captured and barely escaped with his life, caused many deaths and involved leaders of the army, navy and air force. So that Siamese army is a force of prisoners who, by president, should be set free but who, when free, might encourage another revolt. The prisoners are shown in a government camp while their fate is being debated by the government.

TWO OF SEVEN SURVIVE FISHING TRIP—Don Fletcher, (left), of Ferguson, Ont., and Kenneth Hill of Dayton, are the sole survivors of a party of seven after a fishing excursion in Lake Simcoe. Gone from the father, grandfather and three of his uncles when the overcrowded fishing launch in which they were heading for Lake Simcoe was struck by a log and capsized. Fletcher and Hill were near exhaustion themselves when their cries for help were heard by another fishing party.—Central Press Canadian.

ROYALTY OF THE NUDE COLONY—At the annual meeting of the Eastern Sunbathing association at Mayo Landing, N.J., Mrs. Margie Stone, 58, of Promont Park, Pa., and Jimmy Stone, 26, of Painesville, Pa., were chosen King and Queen of the nudists. More than 500 delegates attended the accepted nudist assembly.—Central Press Canadian.

DEEP FREEZE GIRL—The woman who made a place for herself in medical annals last winter by surviving after having the lowest body temperature on record, Dorothy Mae Stevens of Chicago, is now a wheel chair convalescent. The lost leg, a foot and part of a hand from freezing, but otherwise appears to have suffered no ill effects.
